

## **DOCTORS BILLING/INVOICING SERVICES**

By the nature of your medical practice as a doctor, you can be called to render services in other hospitals or clinics.

As a doctor you will not bill the client or insurance directly but the hospital where you attended the client. At times it can be annoying to follow for your payment or it can be a cumbersome process for you to follow for your payment. At times your invoices as a doctor can be misplaced and nobody will inform you about the same. This means that some of your bills are not paid at all and you lose revenue for your practice.

To help solve this problem, Dunik Medical claims is the only specialist company registered in Kenya to follow these bills/invoices for you as a doctor to ensure that you are paid not only in time but also that all your invoices are paid.

Dunik Medical Claims ensures that all your invoices are paid and will update you on each and every bill payment while you concentrate on your medical practice.

All you need to share with us is a copy of your invoice and you wait for your money in the bank. Our system will also help you track all your invoices real time from anywhere at any time from any gadget including your phone 24/7
