

Doctor's appointment booking - Book a Doc

BOOK A DOC is our system that connects patients and doctors through an online platform. Through our system we help patients search for doctors and book appointments. The platform also helps doctors access to a community of patients registered in our system. The system also enables doctors to get and manage patient appointments. The system is entirely Web-based, it requires no software to install and enables two-way communication between doctors and patients.

Patients

We help patients to find the perfect doctor and book an appointment in the easiest way and get them find the best possible care anytime, anywhere.

Our system is one-of-a-kind web based that lets patients:

- Register online
- Search for Doctors
- Book doctors' appointments
- Send notifications to the doctor about appointment booking
- Send reminder texts and emails to patients to confirm appointments

Doctors

We help doctors get access to a community of patients registered online. The Doctors profile is also raised by being online and through the system they doctors get new patients and manage patient appointments. With our integrated end-to-end solution, doctors are able not only to improve their online presence, get new clients and manage patient booking appointments

Our system helps doctors to manage patient appointments through:

- Blocking the days or times the doctor will not be available
- Set the limit of patients the doctor will want to attend in a given day
- Giving patients return dates

Features include

- Color coded calendar
- Appointment reminders
- Data analytics
