

## **Medical Claims processing**

Medical claims processing service is a doctor's key to getting paid. Doctors and other health-care providers have had to operate in a system where they have to wait for long for their claims to be paid. Medical Claims Management dramatically increase a doctor's immediate revenue. Through the use of technology. Medical Claims Management electronically transmits insurance claims directly to the insurance company for payment.

The medical billing insurance claims process starts when a Doctor treats a patient and sends a claim for services provided to a designated payer, which is usually a health insurance company. The payer then evaluates the claim and pays.

At Medical Claims management we help Doctors and other health care providers process medical claims so that they can get paid faster. We do the following

1. Collect all medical claims from the doctor and submit them to the insurance
2. Scan the documents for billing errors and correct them if needed
3. Adjudicate client claims for accuracy
4. Submit and file the claim with the insurance company
5. Follow up on the claims with the insurance company for payment
6. Apprise you of the status of the claim
7. Process denied claims and re-adjudicate them for claims submission
