

Our system

Our system MEDClaim makes it easy for medical providers to enter information directly into the system in one easy to use interface. The system is web-based that can be accessed at anytime from anywhere 24/7. Our system eliminates the need to use a lot of paper work. It helps users to track all claims and medical billing real time.

Our major features include:

- Simple, clean, state-of-the-art Claims Management Application
- Visual Dashboard showing in a glance your medical practice
- Dynamic, High-level edits built within application
- Specialized reporting tools to help providers manage their practices
- No additional hardware or software required
- Desktop/Web Browser Accessibility
- Secure HTTPS connection
- Manages patient appointments
- Allows patients to search and book for a doctor's appointment
